

MistKing®

Quality Misting Systems

Used By ZOOs, Botanical Gardens, Institutions & Hobbyists Around The World

Timers & Controllers

- Backlit LCD control panel.
- Rechargeable backup saves settings in case of power failures.
- Manual override for misting without affecting timer setup.
- Designed specifically for use with MistKing Misting Systems.

Seconds Timer: ST-24

- Ver5 Upgraded Electronics! Rated 3X Higher than old Ver4 timers. More robust, better equipped to handle power outages and inductive load demands of the pump.
- 10 programmable events (P0-P9).
- Precisely schedule start time for each program.
- Precisely set misting duration for each program.
- Option to schedule each program either on a specific day of the week or repeating daily.
- Program example: Mist at 2PM for 40 sec. daily.

Hygostat - Thermometer: HT-24

- Remote Humidity / Temperature Probe.
- Precisely set Day & Night humidity.
- Low humidity alarm.
- Humidity variance setting.
- Monitors temperature at the sensor.
- Maintains desired humidity based on real time humidity measurements.
- Program example: Maintain humidity at Day: 75%
Night: 65%.

Repeat Cycle Timer: RCT-24

- Precisely set when day & night modes start.
- Day & Night Modes with separate configurations for ON/OFF cycles.
- Able to repeat different misting cycles during day and night.
- Program example: Day: Mist every 45min for 15 sec
NIGHT: Mist every 3 hrs for 20sec.
